

SPL3 Project Proposal Form, 2026
Institute of Information Technology (IIT)
University of Dhaka

Student's Name:	Abdus Salam Islam Badhon		
Student's Roll:	1401	Phone:	01305085443
Project Title: CodePulse: Coding Performance Analyzer Motivation: On current online coding platforms Codeforces users have to select problems based on the filtering only by the ratings and topics of the problems and not based on the previously solved problems and performance of individuals as well as others. Also, the users cannot see how many problems on each topic of problems have already been solved and also the weakness measurement on each topic. Project Description: CodePulse is a Progressive Web APP(PWA) designed to analyze and enhance performance of coding practice on Codeforces. Here the user can also maintain his/her profile, perform log in and registration. Upon login the user has to provide Codeforces handle which will be used to fetch the previous submissions details. These submission details will be used to calculate the analytics and other details. The system will sync the submissions from time to time so when the user can see results based on the updated submissions. The user can also sync by himself. Solution: CodePulse will show the tracking of problems solved on each topic along with weakness details on those topics. The user can also get recommended problems to solve next based on previous submissions of him/her as well as of other submissions. The user can also see verdict split of the previous submissions as well as the difficulty breakdown of the solved problems.			
Languages or Tools to be used: Spring Boot, Postgress, Next js, Postman, Github			

Supervisor's Name: Mohd. Zulfiquar Hafiz (Zuel)

Signature of the supervisor: _____
